EuP Ready Motherboard

EuP Ready Power Supply

EuP System

What is EuP?

EuP, stands for Energy Using Product, was a provision regulated by European Union to define the power consumption for the completed system. With the great quantity and the popularly using of the electrical products nowadays and the continuously increasing of the electrical products categories in the following 20 to 30 years, European Union decided to establish an effective strategy to solve the energy consumption problem. That is, according to EuP, the total AC power of the completed system shall be under 1.00W in off mode condition.

ASRock X58 Extreme, Worldwide First EuP Ready Motherboard!

To meet EuP standard, an EuP ready motherboard and the EuP ready power supply are required. As a motherboard vendor with eco-awareness, ASRock is the pioneer to develop "EuP Ready" motherboards based on the great efforts of our exceptional hardware design.

Today, ASRock proudly announced that X58 Extreme is the Worldwide First EuP Ready motherboard. With X58 Extreme, you are confident to setup a system to pass the EuP standard.
