COMFORTABLE COMPUTING FOR STUDENTS

HP helps students
learn and play
in comfort

Growing minds and growing bodies need computing accessories that help them connect with their world in comfort. Computers used in schools are often designed for adults and placed on fixed-height tables or used with chairs that are not adjustable. Awkward postures may result in discomfort that can interrupt concentration and distract students from learning. HP offers a wide range of keyboards and accessories to enhance students' learning experience.

Type in comfort

The HP Mini-Keyboard removes the numeric keypad so students can work with the mouse in a more comfortable position and relax their arm and shoulder. Beyond the keyboard's reduced width, students can adjust the slope which studies suggest may lead to improved wrist postures and increased wrist comfort. This keyboard also leverages the same thorough reliability and "touch and feel" testing and design as the standard HP Keyboard.

Change your perspective

Both the HP L1945w 19-inch Widescreen LCD Monitor and HP L2245w 22-inch Widescreen LCD Monitor feature a dual-hinge design that provide an impressive 40 degree range of tilt and 5.1" range of height adjustability (including close-to-the-

desk placement). Children of various heights (even kindergartners) can find a position that is comfortable for them.

Integrate your experience

The HP Integrated Work Center Solution is a compact, minimal-footprint PC and monitor configuration that combines flexibility and computing performance. Its unique, HP-exclusive design has tilt, swivel, and height adjustment settings that help students of all sizes find comfortable viewing. The HP Integrated Work Center is compatible with a variety of HP monitors, the HP Compaq dc7900 Ultra Slim Desktop PC and HP Thin Clients.

Headphones

Make your multimedia environment more conducive to learning by allowing each student to have a personal headphone. The APC 3.5 mm Headphone is a low-cost solution great for any student. Having a personal headphone may help reduce the spread of germs and bacteria.

COMFORTABLE COMPUTING FOR STUDENTS

HP recommends Windows Vista® Business

HP Mini-Keyboard

- Reduced size is better suited to the smaller shoulder widths of children
- With no numeric keypad, this smaller width keyboard provides students with a more comfortable computing experience
- User-selectable, zero-degree slope for student comfort

HP L1945w 19-inch Widescreen LCD Monitor or HP L2245w 22-inch Widescreen LCD Monitor

- Find the most comfortable viewing position with 160-degree viewing angles, 40-degrees of tilt, and 90-degree pivot rotation. Provides clear viewing for one or for several students learning as a team.
- The 5.1 inches of height adjustability includes a special low-point design feature that allows even young students to view at eye level comfort with the monitor's lower bezel close to the desk

HP Integrated Work Center

- Adjustable height, tilt, swivel and pivot for a more comfortable viewing experience
- Frees space on the desktop, providing more space for schoolwork and books

APC 3.5 mm Headphone

- Helps make your multimedia environment more comfortable by allowing each student to have a personal headphone
- Low-cost for easy replacement
- Reduces the potential spread of germs and bacteria
